FULL STACK DEVELOPER

PROFILE INFO

A full stack developer is a software developer who has expertise in all layers of software development, including front-end, back-end, and database development. They are proficient in multiple programming languages and technologies and can handle all aspects of developing a web application, from designing the user interface to implementing server-side logic and managing databases. They are highly sought after in the tech industry for their versatility and ability to work on both the client and server sides of a web application.
